 SYMPOSIUM DETAILS 

To celebrate the 20th anniversary of the Head & Neck Course, the Department of Surgery and the Department of Clinical Oncology of The University of Hong Kong are co-organizing the first Hong Kong Nasopharyngeal Cancer Symposium.

Nasopharyngeal cancer is a disease of particular relevance to Hong Kong because of its high incidence among the Southern Chinese. Over the years, our clinicians and scientists have made significant contributions, from the understanding of the disease to achieving better treatment outcomes for patients suffering from this deadly cancer. The Hong Kong Nasopharyngeal Cancer Symposium 2014 draws together oncologists, surgeons and scientists and provides a platform where advances in treatment and updates on research will be presented and discussed. The symposium features plenary lectures, poster presentations, round-table discussions and case presentations, providing an optimal learning experience through an ample opportunity of interaction between the faculty and course participants. An optional hands-on workshop will be offered separately, which provides a practical experience on target contouring and dose prescription for clinical oncologists, and on salvage nasopharyngectomy via the Maxillary Swing approach for surgeons.

**CO-ORGANISERS**

- Center for Nasopharyngeal Carcinoma Research
- Hong Kong Head & Neck Society
- The Hong Kong College of Otorhinolaryngologists
- Hong Kong College of Radiologists
- The College of Surgeons of Hong Kong

**CME / CNE ACCREDITATION**

- Hong Kong College of Otorhinolaryngologists
- Hong Kong College of Radiologists
- The College of Surgeons of Hong Kong
